

## Cassette Joint Units

There are two cassette joint units for 8 speed hubs, the standard CJ-8S20 and the Scandinavian version CJ-8S40. The Scandinavian version uses a rubber bellows to keep the cable from icing over where it would normally be exposed.

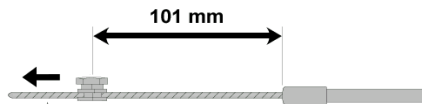

4 speed and 7 speed hubs use the CJ-NX10

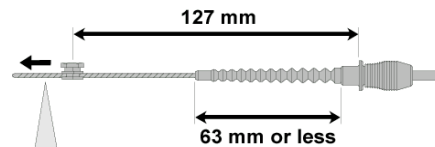

CJ-8S20

CJ-8S40

Pull the inner cable while attaching the inner cable fixing bolt unit.

## Push Rods

3 speed hubs use different push rods to accommodate different axle lengths. If the wrong push rod is used, the bike will not shift properly.

Model	SG-3C41			SG-3R40		
Axle length(mm)	168	175	178	170.3	176.8	189.4
Push rod length(mm)	81.85	86.85	86.85	81.85	86.85	90.75
Part Number	Y33R98080	Y33S98180	Y33S98180	Y33R98080	Y33S98180	Y33S98290
